Requirements for Case 22028

Re : OER 10210

Any details of Sino-Soviet Bloc economic activities in Burma would be appreciated.

In particular, we would like information as to building progress, number of Bloc personnel engaged, cost estimate, and difficulties encountered by the Bloc in development of the following projects: (a) expansion of textile mill by Communist China; (b) construction of a Technological Institute by the USSR; and (c) construction of a hospital, stadium, and exhibition hall by the USSR. Also, we would appreciate any information as to Bloc activity in the areas of extractive industries and agriculture.

We would also appreciate source's comments on his observation of Bloc commodities being advertised, marketed, and used in Burma.
